Summary

B.Tech student specializing in Robotics and Artificial Intelligence with a strong interest in software development, problem-solving, and emerging technologies. Currently building a strong foundation in C++, Data Structures and Algorithms, and programming fundamentals. Experienced in academic and innovation-driven projects involving robotics, sensors, AI, and real-world problem solving. Eager to apply technical skills, learn from industry experience, and contribute effectively to an internship role.

Work Experience

Robotics & AI Trainee

Aerobot Pvt. Ltd.

Jun 2026 - Jul 2026

Hands-on training in Robotics and AI with practical exposure to sensors, actuators, drone fundamentals, and robotic systems. Worked on object detection and water droplet detection projects.

Education

Bachelor of Technology (B.Tech)

chandigarh engineering college

2024- 2028 • Undergraduate

Education Description:
Pursuing B.Tech in Robotics and Artificial Intelligence, with a focus on programming, software development, robotics, and AI technologies. Actively developing technical and problem-solving skills through projects and practical learning.

Responsibility

- Assisted in developing robotics and AI-based projects using sensors and hardware components.
- Applied programming and problem-solving skills to practical technical tasks.
- Collaborated with team members during project development and testing.
- Contributed to technical presentations, demonstrations, and innovation activities.

Projects

StepVolt – Smart Footstep Energy Harvesting System
Developed a smart energy-harvesting concept using piezoelectric sensors and electromagnetic induction to generate electrical energy from footsteps.
Oil Spill Detection & Monitoring System – SIH
Worked on an AI-based solution using satellite/SAR imagery and AIS data to detect oil spills, identify potential vessels involved, and support real-time monitoring.
Object Detection Robotic Model
Developed during robotics training with practical exposure to sensors, robotic systems, and object detection concepts.

Achievements

- Won the internal round of Smart India Hackathon (SIH) with a team-based technology solution.
- Participated in technical innovation and project development activities through IEEE.
- Contributed to the development of StepVolt, a smart footstep energy harvesting project.
- Participated in technical events and collaborative project-based activities.

Skills

- Programming: C++
- Python (Basic) Data Structures & Algorithms: Arrays
- Basic Problem Solving Web Technologies: HTML
- CSS
- JavaScript (Basic) Core Computer Science: OOP
- DBMS
- Operating Systems Tools & Platforms: Git
- GitHub
- VS Code AI & Robotics: Sensors
- Robotics Fundamentals
- AI/ML Fundamentals

Certificates

LinkedIn Learning — Digital Edge 101
Aerobot Pvt. Ltd. — Robotics & AI Training
IEEE — StepVolt
Smart India Hackathon — Internal Round
